FALL IN LOVE WITH ROSE GOLD

FALL IN LOVE WITH ROSE GOLD

Crafting a blend of two of nature's most evocative colors finds its expression in Kohler's newest offering for its Vibrant faucet finishes – Rose Gold. The new finish maintains a balance between lustre and allure, conveying softness, refinement and celebration. A faucet in Rose Gold displays a warm sheer and possesses a flawless consistency.

The resplendent yet understated nature of the Rose Gold finish provides homeowners, design aficionados, architects and designers an appropriate choice for imbuing their spaces with a focal point of unyielding subtlety. Set among other fixtures, this finish is poised to draw the eye to elegant neutral tones without losing its own distinctive character. Such qualities enable the Rose Gold finish to fit suitably across a broad range of palettes.

KOHLER®

A faucet bearing Rose Gold is free of blemish and is guarded against tarnish and corrosion, made possible through the use of a process known as Physical Vapor Deposition (PVD). In this process, vaporised finish material is molecularly bonded to a protective layer of chrome allowing PVD to enhance the durability of a faucet beyond twice the industry benchmark.

In encapsulating the bloom of a rose veiled in golden hue, the Rose Gold faucet finish gives the elemental pairing of allure and lustre a luxuriant nod.

The Rose Gold finish looks stunning on both classic and contemporary faucet styles

Contemporary (Purist)

Classic (Kelston)

What is a KOHLER Vibrant PVD faucet finish?

- Vibrant PVD finishes are the result of a state-of-the-art PVD (Physical Vapor Deposition) process that vaporizes a coating finish material and deposits it on the faucet for a super hard surface.
- A nickel undercoating enhances the strength and color integrity of KOHLER PVD finishes.
- KOHLER faucet finishes twice exceed the industry durability standard.
- Physical Vapor Deposition (PVD) technology gives KOHLER faucets a rich luster that resists scratching, tarnishing and corrosion
